

## FCSD #2 Employee COVID-19 Flowchart

To be considered **exposed** to COVID-19, you need to have prolonged close contact with a person who has the virus. Close contact includes living in the same household, caring for a sick person with the virus, being within 6 feet of a sick person with the virus for at least 15 continuous minutes without the use of a face covering, or being in direct contact with secretions from the sick person.

## Isolation and COVID-19

- Staff who are given an isolation order will be required to stay home until they meet criteria for release: At least ten days since the symptoms started, without fever for at least 24 hours without the use of fever-reducing medication, and respiratory symptoms have improved.
- If the infected person had no symptoms, they will be released once ten days have passed since their test was collected.
- Once a staff member has met the criteria for release from isolation, they will be given a release letter from public health officials and can return to work.

## Quarantine and COVID-19

- Staff who have been given quarantine orders will be asked to stay home for 14 days after their last exposure to the infected person, monitor for symptoms, and seek testing. A negative test does not shorten the length of quarantine.
- Once a staff member has completed their quarantine period and has not developed symptoms or tested positive, they can return to school.

## SYMPTOMS OF COVID-19

*People with these symptoms may have COVID-19:*
